

EPSO Reasoning tests

Preface

Preface

EU | EPSO TESTS

To assist you in preparing for the EPSO exams [Training4EU Team](#) provides you with a series of sample tests with examples of verbal, numerical, abstract, situational judgment, accuracy & precision, and prioritizing & organizing questions.

1. Verbal Reasoning: Using a short paragraph of text on virtually any topic, this test requires to choose from 4 or 5 answer options the one that fully matches the statements in the original text. There is always only one correct answer because other options may contain insuffi-

cient information or false statements. There are 20 verbal reasoning questions in a competition, and the allocated time is 35 minutes.

2. Numerical Reasoning: In the form of multiple-choice this test requires data interpretation and mathematical calculations. Using information presented through tables and graphs, you will be required to draw conclusions and calculate changes within these data sets. Basic mathematical skills such as percentages, arithmetic operations, and ratios must be reviewed prior to taking the test. There are 10 numerical reasoning questions in a competition, and the allocated time is 20 minutes.

3. Abstract Reasoning: Using a series of images, this test requires candidates to identify which one should be next in the row, based on an inherent logic between the presented images. There are 10 abstract reasoning questions in a competition, and the allocated time is 10 minutes.

4. Situational Judgement Test: This test requires candidates to choose the most favorable and least favorable course of action in a given situation. Candidates are expected to have a basic understanding of corporate culture and code of conduct to successfully pass the test. There are 20 situational judgement questions in a competition, and the allocated time is 30 minutes.

5. Organizing and Prioritizing Test: This test requires candidates to check a table with various informa-

tion about schedules, timetables, agendas, vehicle capacities and other practical information and find the best solution to a practical organisation or logistics problem. There are organizing and prioritizing 20 questions in a competition, and the allocated time is 24 minutes (AST level only).

6. Accuracy and Precision Test: This test requires candidates to identify, based on a table and various icons, mistakes, errors, typos or other 'inaccuracies' in a control line under a heavy time-pressure. There are 40 accuracy and precision questions in a competition, and the allocated time is 6 minutes (AST only).

Sample Tests

Sample tests can give you an idea of the type of questions and level of difficulty you will face during the competitions.

Time Limits: Contrary to the actual EPSO tests where they have to be completed within an allowed time, the provided sample tests have no limit for answering the questions. The purpose is to get yourself familiarized with EPSO questions concept, and understand their reasoning within a stress-free pace.

Great features of these sample tests - Guest Mode:

No expiration limit or date for the tests

No personal data is extracted

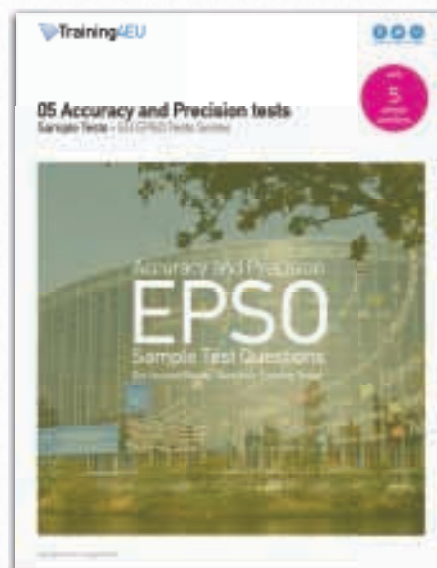

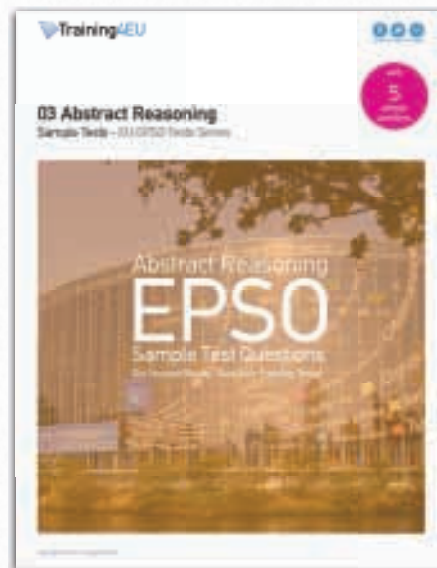

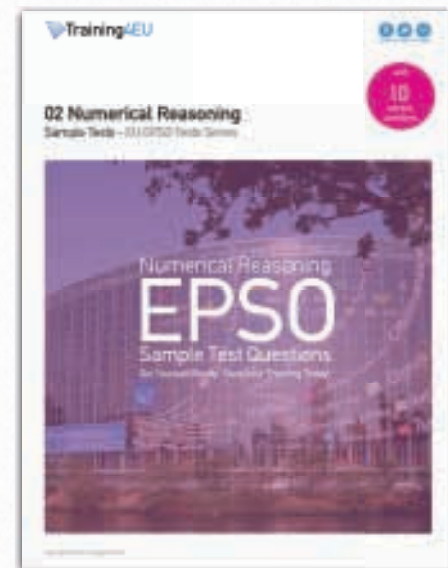

No account or registration needed

Yes, it helps you practice at your own pace, with helpful hints and solution tips. A great way to enhance your learning

About Training4EU

Training 4EU Team provides free on-line Training Services on potential candidates who would like to become tomorrow's permanent EU Officials.

With a mix of theory, exercises, and simulation tests we support you on EPSO pre-selection tests.

© 2016 Training4EU Publication Team

Training4EU is independent from the European Union institutions.

The sample tests have been extracted from the EPSO official web site.
